# extremely happy

Hi Curt,

Sometime, over a year ago, you helped me select Air Handling System's products for my home workshop. I got sidetracked and didn't install the system until this year. I am sending you a few photos of my shop. As you can see I ran the main line along the ceiling and dropped down to my woodworking tools.

I am extremely happy with the system. The ducting and fittings went together very well. The blast gates are well designed and constructed.

I sealed the joints with aluminum-colored silicone caulk as you had suggested. I'm using a 2 hp Oneida cyclone dust collector. I get great suction at all my tools. I'm even pleasantly surprised that I get ample suction through the full 25 feet of 2 1/2 inch hose of the industrial vacuum kit I bought from you.

Thank you for your advice on my system design and on collection nozzles for my tools.

I will call you with an order for a few more parts I need to hook up my jointer.

John Murray,
