Mr. Curt Corum

I had to write you this letter to express my deepest gratitude for what you are doing for us. What you are doing for us is far beyond anything we could ever think of asking for.

We already have all the parts in place giving us the ability to get the hoses up off the floor when there are not in use, this taking away a tripping hazard. Not too mention an increase in productive.

For myself I can see the change in the guy's attitude working. I had also added a remote switch for the current dust collector. The change may be small but the change for us is monumental.

I can't express enough my apparition for your consideration. I very much hope to meet you in person some time in the future.

William Pinney
