

## Dust Collection Solution for CNC Router

**Ball Joint and Urethane Flex Hose, Perfect Solution for CNC Router.** Optimum CNC Router operation requires the proper fittings and flexible hose. Our **Ball Joint** allows for free rotation of the cutting head and our **U30 flexible hose** is perfect for heavy-duty woodworking applications requiring tear, puncture, and abrasion resistance.

**Superior Abrasion Resistance U30 flexible hose** is perfect for heavy-duty woodworking applications requiring tear, puncture, and abrasion resistance such as CNC routers, moulders, and planers. 30-MIL thick thermoplastic urethane with a wire helix handles higher static pressure and vacuum levels than other hoses.

**Swivel Ball Joints with an EXTENDED collar** connects flexhose to metal ductwork allowing free rotation. Do not be undersold just to save money. Most companies sell short collars, which are detrimental to installation. We add a collar to ease connection to hose. Constructed of galvanized steel, 20-gauge.
